

SHASHANK C A

Software Developer | Full Stack Developer

✉ shashank.ca156@gmail.com | ☎ +91 7760219785 | [in LinkedIn](#) | [GitHub](#)

Profile

Information Science undergraduate with experience in Full Stack Development, Java Development, and AI-powered applications. Skilled in Java, Python, JavaScript, React.js, Node.js, Express.js, Spring Boot, MongoDB, and MySQL. Strong foundation in Data Structures & Algorithms, OOPs, DBMS, Operating Systems, and Computer Networks. Experienced in building web applications, automation systems, and intelligent recommendation platforms. Seeking Software Engineer, Full Stack Developer, or Java Developer opportunities.

Education

Bachelor of Engineering in Information Science and Engineering, *Cambridge Institute of Technology, Bengaluru*
CGPA: 8.9/10

Technical Skills

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Core Java:** DSA, OOPs, Collections Framework, JDBC, Multithreading
- **Frontend:** HTML, CSS, JavaScript, React
- **Backend:** Spring Boot, REST APIs, Node.js, Express.js
- **Database Management:** MySQL, MongoDB
- **Tools & Platforms:** VS Code, Eclipse, Git, GitHub, Android Studio
- **Concepts:** Operating Systems, Computer Networks

Internship

Software Developer Intern, Samsung R&D Institute Bangalore (SRIB) – PRISM Program

- Designed and developed a scalable workflow management system to automate enterprise business processes and improve operational efficiency.
- Built and integrated React.js frontend components with ASP.NET (C#) APIs and SQL Server database, ensuring seamless data flow and reliable system performance.

Android App Developer Intern, Mind Matrix

- Developed Android applications using Java, Firebase, and MVVM architecture with authentication and real-time data management.
- Integrated REST APIs, Firestore, and RecyclerView to build scalable mobile applications with improved user experience.

Projects

StartupSync (SSS) – Startup Founder Matching Platform

Java 21, Spring Boot 3, React, PostgreSQL

- Built a full-stack SaaS platform for startup founders to create startups, manage teams, and connect with skilled professionals.
- Implemented JWT authentication, AI-based matching, real-time chat, task management, and REST APIs using Spring Boot and React.

Smart Hospital Management System

MERN Stack, JWT, MongoDB

- Developed a hospital management system with appointment scheduling, patient record management, and inventory tracking functionalities.
- Implemented JWT-based authentication and role-based access control for administrators, doctors, and patients, ensuring secure system operations.

Languages

English (Advanced), Kannada (Fluent), Telugu (Advanced)
